

# Osmium Box Mods (60 USD)

Location **Hawaii**  
<https://www.genclassifieds.com/x-633942-z>

WOW!!!! Paradigmz has done it again!!! A very solid box mod with force-fitted copper inside delrin. Very detailed design on the logo. No more heating tubes, no polishing needed, and no thermal expansion issues. Definitely a must have for your collection!!!

Its gotta be one of the easiest box mod you can take apart for cleaning. It took me about 10 seconds. It's really that easy.

### Specs

Force-fitted copper block inside the delrin making it resistant to heat.

Adjustable 510 connection

Slim and compact full mechanical box mod.

Custom made Brass or Copper with silver coated copper positive contacts (mechanical switch)

Adjustable silver coated copper negative pins.

Parallel dual 18650 configuration.

The brass copper plate with Paradigmz logo.  
 To move the switch by 2mm the cap there's a silver small hole should be turned.  
 If you unscrew the atomizer and firing switch for cleaning. Make sure the contact goes in the same way to prevent short. Looking at the mod with the paradigmz logo if front of you. The contact should go in with the thicker delrin on the left.
