I have a beautiful 3 mos old puppy.. He is black mouth cur/ leopard catahoula mix..his coloring is what you would call red merle... And so his name is red :).. He has already had (with the vet)two rounds of worming.. first set of puppy shots ...1 month dose of flea prevention.. 1 month dose heartworm prevention.. All of which i have reciepts for so that you can transfer him over to your own vet without starting over.. He will be due for his next set of puppy shots in 3 weeks... He is very smart plays fetch and sits .. Housetraining is in progress..hes super sweet and affectionate with our family (which includes young children)and our other dogs..however he is scared of strange people and dogs will yelp growl and pee..he will make a great family dog but will absolutely need someone who can take the time to SOCIALIZE him with exposure to new places and people and positive reinforcement ..also his breed gives him the potential to be a great hunting dog with proper training if that is what your looking for...he needs a good home because i do not have the extra time and money to do this properly.. We already have enough animals and i was talked into keeping him but have been doing the majority of the work he requires on my own..will be sorry to see him go but it is the right thing to do.. his rehoming fee is 250\$ (Negotiable) to ensure a good home and recover some vet costs .. Email

or text

.. His father is also up for a new home on cl if ur interested in looking at him under blackmouth
