

Need a Bootstrap Tutor (KOP Area)

Location **Pennsylvania**
<https://www.genclassifieds.com/x-675562-z>

I need to get up to speed with Bootstrap for my job. I need someone highly knowledgeable in bootstrap to teach me basic through advanced skills. I am a html/css builder and have had some trouble adjusting to the precoded templates of bootstrap.

I will need someone to take me step by step in creating a new bootstrap template. I have one I designed for html/css a while back, and would like to work on that since it is familiar. The below link is the site that I would like to practice on and convert to bootstrap. I want it to look exactly the same, but using bootstrap.
<http://www.e-l-v-a.com>

I will also need someone who can go over already designed bootstrap sites and show me how to work with them. You will need to come to my place. I work on a MAC and CS6 (not cloud) Dreamweaver.

Please send me some proof of your experience with.
