Hello, we are ferret rescuers! Named after our first rescue, we take in abandoned and unwanted ferrets, foster them for as long as needed, and then adopt them out to the perfect families. We spend a great deal of time and consideration before adopting them out. Our ferrets will be adopted out in pairs, or single ferrets will go to homes that already have a ferret so no one is alone, since they love companions! Having over 10 years of ferret experience, we are happy to answer any questions you may have about your own ferrets, or just in general. If you have, or know of any ferrets needing to be rehomed, please contact us before giving them up to someone offering money. It's about giving them the life they deserve, thank you! So far in the 4 months of fostering and adopting, we have found homes for 16 ferrets! Currently awaiting more for adoption, none ready yet. Also pleased to announce we have just made our Facebook page, and website is still in the!
