I offer expert graphic and web design, specially tailored to be affordable for indie authors, professionals and small businesses or other small projects. By building from specially constructed templates, I'm able to offer web design services at a deeply discounted rate, while still offering completely custom design and all the features you need.

All sites are built on Wordpress, so they're easy for you to update in the future (and you can find lots of support online). Or, you can pay a small fee to have me do updates for you, on a one-time or monthly basis.

Whether you're selling books, services or expertise, your personal brand is an important aspect of your marketing. Branding design helps you present a coherent and effective presence across different platforms and express your story to your target audience. You need a logo, a website header, branded social media imagery, a color theme, coordinating textures, etc. to help your website, social media and physical products work together to communicate what you're all about.

So check out my web and graphic design packages, and consider bundling both services together to save even more.

Basic Site
 Starting at \$150
