

# Cleanfinish concrete slab (Denver)

Location **Colorado**  
<https://www.genclassifieds.com/x-709065-z>

I have 4400 sf of carpet glued to a concrete slab which is in very good condtion. This floor is in Boston but has extremely convenient access for equipment and parking. I want to do the following:

- remove and dispose of the carpet
- remove the existing adhesive by some means: grinding, solvents or something else.
- wash as required and seal the slab to create a dust-free, long-lasting and attractive concrete finish for an office environment.
