Hi there,

I am wanting to have a wood display custom built. It's a pretty simple design which will look like the photo you see. Let me know about your experience and what you would charge to complete the project. Do you need me to furnish all the supplies? How long will it take? Do you have references?

The final product should be able to sit on top of a table and measure approximately 16 inches wide by 16 inches deep by 16 inches high.

Let me know what questions you have, lets discuss the scope over the.
