Danny is a purebred Maltese puppy He has some vaccines, been dewormed and has a microchip already. My daughter recently bought Danny from a puppy store not realizing the responsibility. She is a college student and just doesn't have the time and i already have three dogs! He probably weighs 2.5-3lbs.. He will come with his crate, mat and the food he has been eating. He came with United All Breed Registry papers with a family tree.. For any questions or more pictures, please contact me .. thanks!
