New with box -- dog training obedience system

PetSafe Adventure Dog Remote Training Collar with tone and static stimulation

Retails at amazon for \$159.99+tax and at petco for \$189.99+tax.

Here's what I like about these units:

- Very well-built; rugged, to withstand impacts; quality materials feel substantial to the touch.
- Charge transmitter & receiver simultaneously w/included cable splitter;
- Consistent stimulation;
- Level 1 stimulation is almost not noticeable (the way it should be), & each level up gives a noticeable difference.
- Well-known brand... PetSafe has been around for a while... and is sold in many pet stores.

8 levels of stimulation plus two tone (sound) training options;
 Range up to 800 yards __--__ Waterproof (consider this as water-resistant, just to be safe);
 Adjustable collar (up to 28"), for small to large dogs...
 or just attach to your own collar for a custom fit.
 (optional: expand to 3 dogs w/extra receivers.)
