QR Code Link to This Post 2 healthy baby females to be rehomed. I have too many and need to reduce my zoo.

\$50 each. No haggling, meet here.

Uromastyx are "display" animals and not normally tame. In time you May be able to gain their trust.

They are strictly herbivores, so no need to keep insects in your home. And as such they are cheaper to feed compared to most other reptiles.

These girls are safely co-habiting together and can continue to live together indefinitely. Buying both does not reduce their.
