This is an internet company that pays people like you and me to send names to their website ~ they, in turn, provide those names to companies so that they can advertise their products. Although it is much like MLM except you do not have to buy the products, and it is free to join, and you do not have to warehouse products.

All you do is post free ads to get persons to the website. It is NOT a scam. It is a real business, honest and legal.
