QR Code Link to This Post Hello all, I am looking for creative individuals who are into video/audio production I have been doing radio for awhile and have had a dream of starting my own tv show! I have all the paperwork completed as I need a production crew. This is solely start up and don't have the means to pay anyone right now. This is for dope ass creative people to come together and potentially start one of the dopest urban talk shows out. I'm willing to discuss more and share previous work and ideas. Please hit me up and you're down to make some art and make some money. I know this can take!!!
