THIN 7 RANGE

With the use of the included SONDORS Thin 36V 8.7 Ah lithium-ion battery along with 7-gears and electric pedal assist, many riders can experience a varied battery range of up to 30-50 miles*. When using straight electric power (without pedaling), the range can fluctuate to around 20 miles*.

SONDORS Thin 7, 36V 10.5Ah battery upgrade provides an approximate increase in range of 34 miles* straight electric and 68 miles* using electric pedal assist.

*Both range estimates are contingent upon rider and towing weight, wind speed and terrain.
