QR Code Link to This Post Hello!

I am looking for someone that can help me bring my menu idea (layout, content, design) to life for my start up business!

Final product can be a graphically designed template or the actual menu available via pdf, word doc, or jpeg with items, pricing, and descriptions (given by me) filled in. Rough description of the idea: Horizontal menu, off white, gold accents or some colorful accents, clean lines for the text boxes and overall a clean, casual, modern, art-deco style menu.

I have attached photos of menus I like or decorative elements that I'd like to use so you get an idea for what I am looking for, but I do have clear concept of what I'd like. If this sounds like something you'd be interested in please respond with relevant work experience, samples, or portfolios!

Thank
