QR Code Link to This Post Hey!

Size:56cm
 Price:Firm

Here I have my OWN bike** Cannondale R5000 that is in like-new shape. Very rare Made in America Frame that is as light or lighter than many carbon frames. The bike as a whole weighs in under 17 pounds and hasn't seen many miles at all.

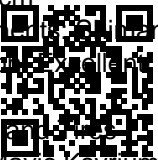

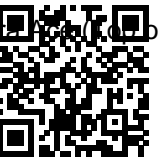

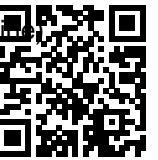

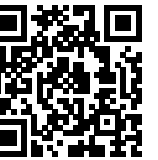

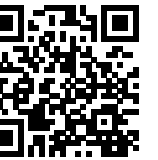

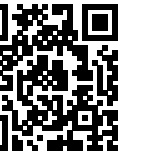

Equipped with top of the line components of Shimano Dura Ace (brake set, shifters, front and rear derailleur).

Carbon fiber fork, crank and seat post.

High-End Wheelset: Mavic Ksyrium Elite's.

You may have noticed that I have a few bikes listed on cl. However, this is my OWN personal bike that I have been looking for quite some time and finally got my hands on a few months back. It's everything I have been looking in a bike as it's as light as a high end carbon frame yet not as stiff of a ride. Adding the highest possible components (Shimano Dura-Ace), Carbon Fiber Crank and High end wheel-set (Mavic Ksyrium Elite's) makes it the ultimate machine. I'm in no rush to sell this beauty and would like for her to go into good hands.**

Little bit about who I am and what I do: I'm currently a full-time student trying to save for my tuition by running a small gig where I tune, clean and find the bikes I have a new home. I run all my bike purchases through bike-index to make sure I have full faith in the history of the bike. I also require a receipt upon purchase and I always write a receipt upon sale. All my bikes are listed very fairly as I never try to overcharge. If you have ANY questions give me a call or text!
