I purchased two of these Marathon motors last week and I only need one. I paid \$75 for it, so my price is firm. All the specs are in the picture below. This is a dual voltage motor, so you can wire it 110/220. It's 1725 RPM, 3/4 HP. It looks like new and the previous owner told me he only used it for fit-ups on machines he was building, and it did not see any "real" use.
