SCHWINN
 56cm WORLD VOYAGER
 ROAD TOURING BICYCLE

This vintage bicycle was purchased from the estate of a collector. The bike is clean, was recently tuned and is in Excellent condition. The bike comes complete with the generator, front and back lights and the bell as shown in the photos. The tires may or may not be original and will probably need to be replaced if the new owner plans on riding it much. The frame and tire sizes listed are close if not correct. The seat is intact with no tears but does show some wear mostly from being leaned against. There is at least one Aberdeen, SD bicycle license on the back of the seat post socket. The one that is visible is a 1973 and I believe it has another underneath it. The friction or paddle shifter levers work well as do all 10 speeds. I believe that this bicycle was made for the Schwinn Company in Japan.

This is a very collectible bicycle that does not come for sale often. It would be a terrific addition to any collection or great for a vintage riding enthusiast.

This bicycle is located in East Casper, WY. We can be flexible with pick up and viewing times. Please call or test with any specific questions.
