QR Code Link to This Post We are selling a 90HP Johnson that has been used on a 16' aluminum boat. The motor ran fine last year and we started it today and it starts, but does not idle and will probably need the carbs cleaned. It has good and even compression on all 4 cylinders between 95 and 105#s. It is equipped with tilt and trim and a stainless steel prop. It does come with controls and wiring harness. - .
