QR Code Link to This Post Small deathcore group consisting of an experienced guitarist/songwriter and a vocalist, looking to expand our sound and write an EP. You can listen to a sample of our music to get a general idea of what we're looking for here: <https://youtu.be/Ah-D7oZw90A>
Must have own set. People with practice space preferred, but others will be considered. Blast beats and quick double-pedal work is needed for the sound we are trying to create. Best of luck to.
