QR Code Link to This Post I have a 2 year old Australian Shepherd. Shes a doll to us- loyal and loving. But hasnt been properly introduced to strangers so she'll bark and even occasionally has snapped at a few guests!!

I dont want to sound like one of "those" people but we really dont have time and its not fair to them. We have 4 dogs, 3 cats, 3 kids and one arriving within two weeks..

Shes been fixed, up to date on vaccinations, and has a crate that she usually sleeps in at night.

We have her papers somewhere showing her purebred and we bought her Texas and flew her up here as a puppy.

She'll be coming with her crate, an extra month of flea treatment, and a gallon ziplock baggy of food so you can switch her to your choice.

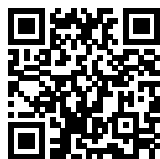

We're asking for a small rehoming fee of\$.
